3 hours from 4pm - 7pm

**299 AED**

**Mariana Ferreiro**  
SLT, MSc, PhD

More than 25 years  
of International  
Experience

# Introduction

**Orofacial Motricity is one of the most important areas of speech and language therapy and has greatly developed in recent years.**

Many health conditions demand assessment and intervention in this specific area.

To do so, the Speech and Language Therapist must understand the fundamentals of Orofacial Motricity once this knowledge impacts the complex process of assessment and intervention and is necessary for the needed clinical reasoning.

# Why should I take this workshop?

**At the end of this workshop the speech and language therapist will be able to:**

- 1** Explain the anatomical and physiological bases of the orofacial musculature;
- 2** Explain the skeletal and occlusal bases in orofacial motricity;
- 3** Develop clinical reasoning based on anatomophysiological bases;
- 4** Develop the basis of the clinical view for the form x function relationship;
- 5** Apply orofacial training based on the parameters of the physiology of clinical practice;
- 6** Develop the clinical analysis for the relationship form x function.

# Booking and payment procedure

Access to Certificate with CMEs

GO TO ***SPEECHCARE.CENTER***

**299 AED**

**1**

Insert your personal data, including your preferred payment currency.

**2**

Proceed with the payment.

**3**

After the transaction, you will automatically receive an email with the receipt and instructions for the course.

**4**

At the end of the workshop you will have access to the platform where you will find all materials and resources.
